JOEL HOUSE

WHERE QUALITY COUNTS

FLAME RETARDANT CURTAIN VELVET

This colour range is available from stock in either of two finishes:-

PYROVATEX® - Durably Flame Retardant to meet the following specifications.

BS5867: Part 2: 1980 Types A,B and C.

BS3120.

DOE/PSA: FRS No.7 (April 1980). Ignition sources 0,1 and 5.

FLACAVON®R Non Durably Flame Retardant to meet the following specification.

BS5867: Part 2: 1980: Type B.

This flame retardant finish will withstand up to six water-free dry cleaning cycles. If wetted in any way it is essential to retreat the fabric to maintain performance.

NOTE: The Flame Retardant specifications for these fabrics are based on the pile area only. The density of the selvedges does not allow full penetration or retention of the fire retardant agents, therefore all tests are carried out on the area of the pile only.

Please stipulate the fabric required by stating the full name and colour number.

Although every effort is made, no guarantee for exact colour matching is given.
